

The **Fast Track** to Minimising Overhead **Costs**

ACCELERATE YOUR PROJECTS WITH A REVOLUTIONARY MODULAR SYSTEM

Introduction

Poor productivity is a pressing issue in the Australian construction industry, amounting to an estimated \$47 billion in lost opportunity over the past three decades. According to a 2023 KPMG survey, only 50% of project owners are meeting completion deadlines. Likewise, raising safety standards remains critically important. Construction is one of the highest risk industries in Australia, with a disproportionate number of accidents and fatalities compared to other sectors.

At SuperAccess™, we believe there is a great opportunity in the market for temporary access solutions to provide enhanced efficiency, elevated safety, and streamlined operations onsite. Our groundbreaking patented system has positively impacted the modular construction industry due to its incredible versatility, water resistance, quick installation, and exceptional safety features.

Read on and allow us to share the unique features that make SuperAccess™ stand apart from the crowd.

Construction Industry Statistics

Poor productivity in Australian construction has an estimated \$47 billion worth of lost opportunity over the last 30 years.

Only 50% of project owners meet completion deadlines (according to a 2023 KPMG survey).

Construction is one of the highest risk industries, with a disproportionate number of accidents and fatalities in Australia compared to other sectors.

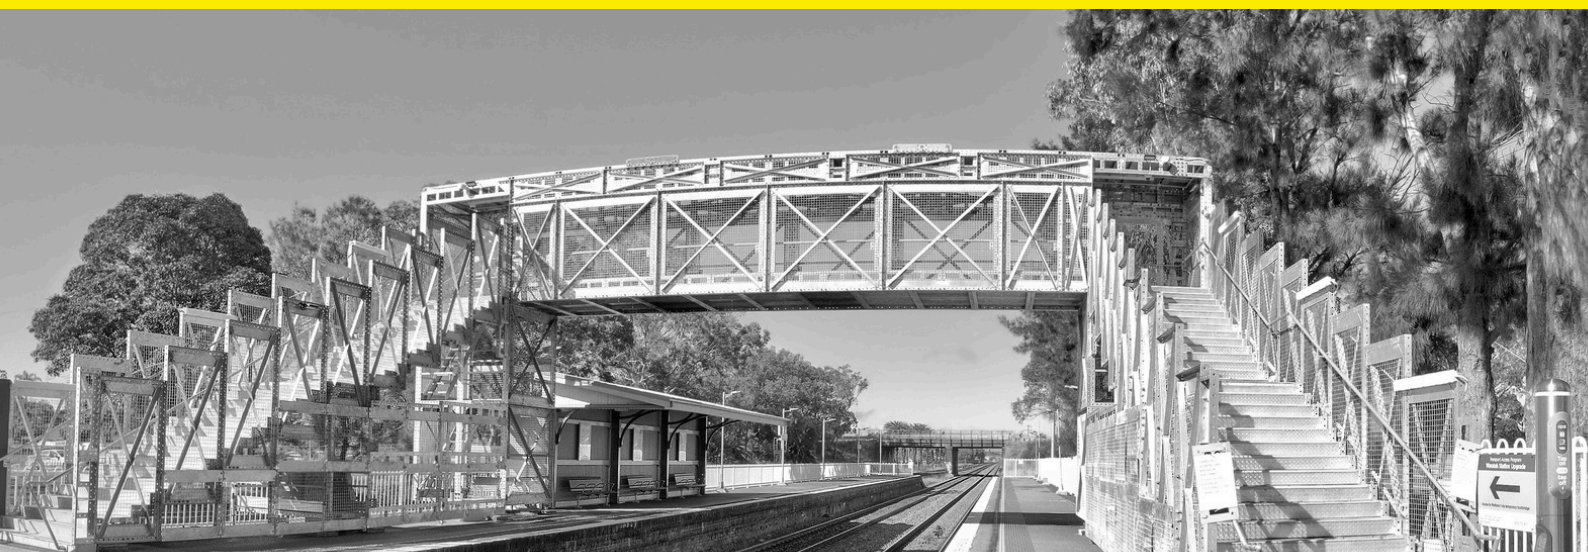

The Benefits of the SuperAccess™ System

Customisation: The sheer versatility of the SuperAccess™ system is another standout feature. Our team can make your modular bridge, stairs, or ramp to suit your exact specifications. We can even continue to modify your installation as your needs change at different stages of construction. Simply tell us what you require, and we'll design a solution.

Exceptional Safety Features: SuperAccess™ fills a much-needed gap in the market when it comes to enhancing the safety of temporary access solutions. The SuperAccess™ system not only meets but exceeds current Australian safety standards. Fixed handrails and the fact that all elements of our temporary bridges or stairs can be fully enclosed with welded mesh significantly protects the public and workers. Galvanized steel offers superior strength compared to aluminium, which means a more advanced and durable modular system regardless of environmental conditions or the length of time on site. DDA compliant, our ramps can facilitate all public access requirements. Our team also carries out periodic safety inspections to meet your site requirements.

The Benefits of the SuperAccess™ System

Faster Installation: The streamlined pre-assembly process performed at our yard ensures that your access solution can be installed in as little as a day. This exceptional speed is a standout feature of the SuperAccess™ system, saving our clients valuable time and resources on site.

Cost Savings: Faster installation is just one of the ways that SuperAccess™ helps save money on projects. Our customisable modular system is made of galvanized steel. As a result of this unique feature, your job site may be able to remain productive regardless of weather conditions. Our clients are thrilled by the cost benefit of our weather-proof access solutions. With significantly less downtime on site, thousands of dollars of lost labour time are saved.

The sky's the limit - literally!: There is no height restriction with our modular installations. So long as we can anchor to a building, there is no limit to how high we can build.

We service Australia wide: As our installations are pre-assembled, your access solution can be loaded onto a truck and delivered anywhere in Australia.

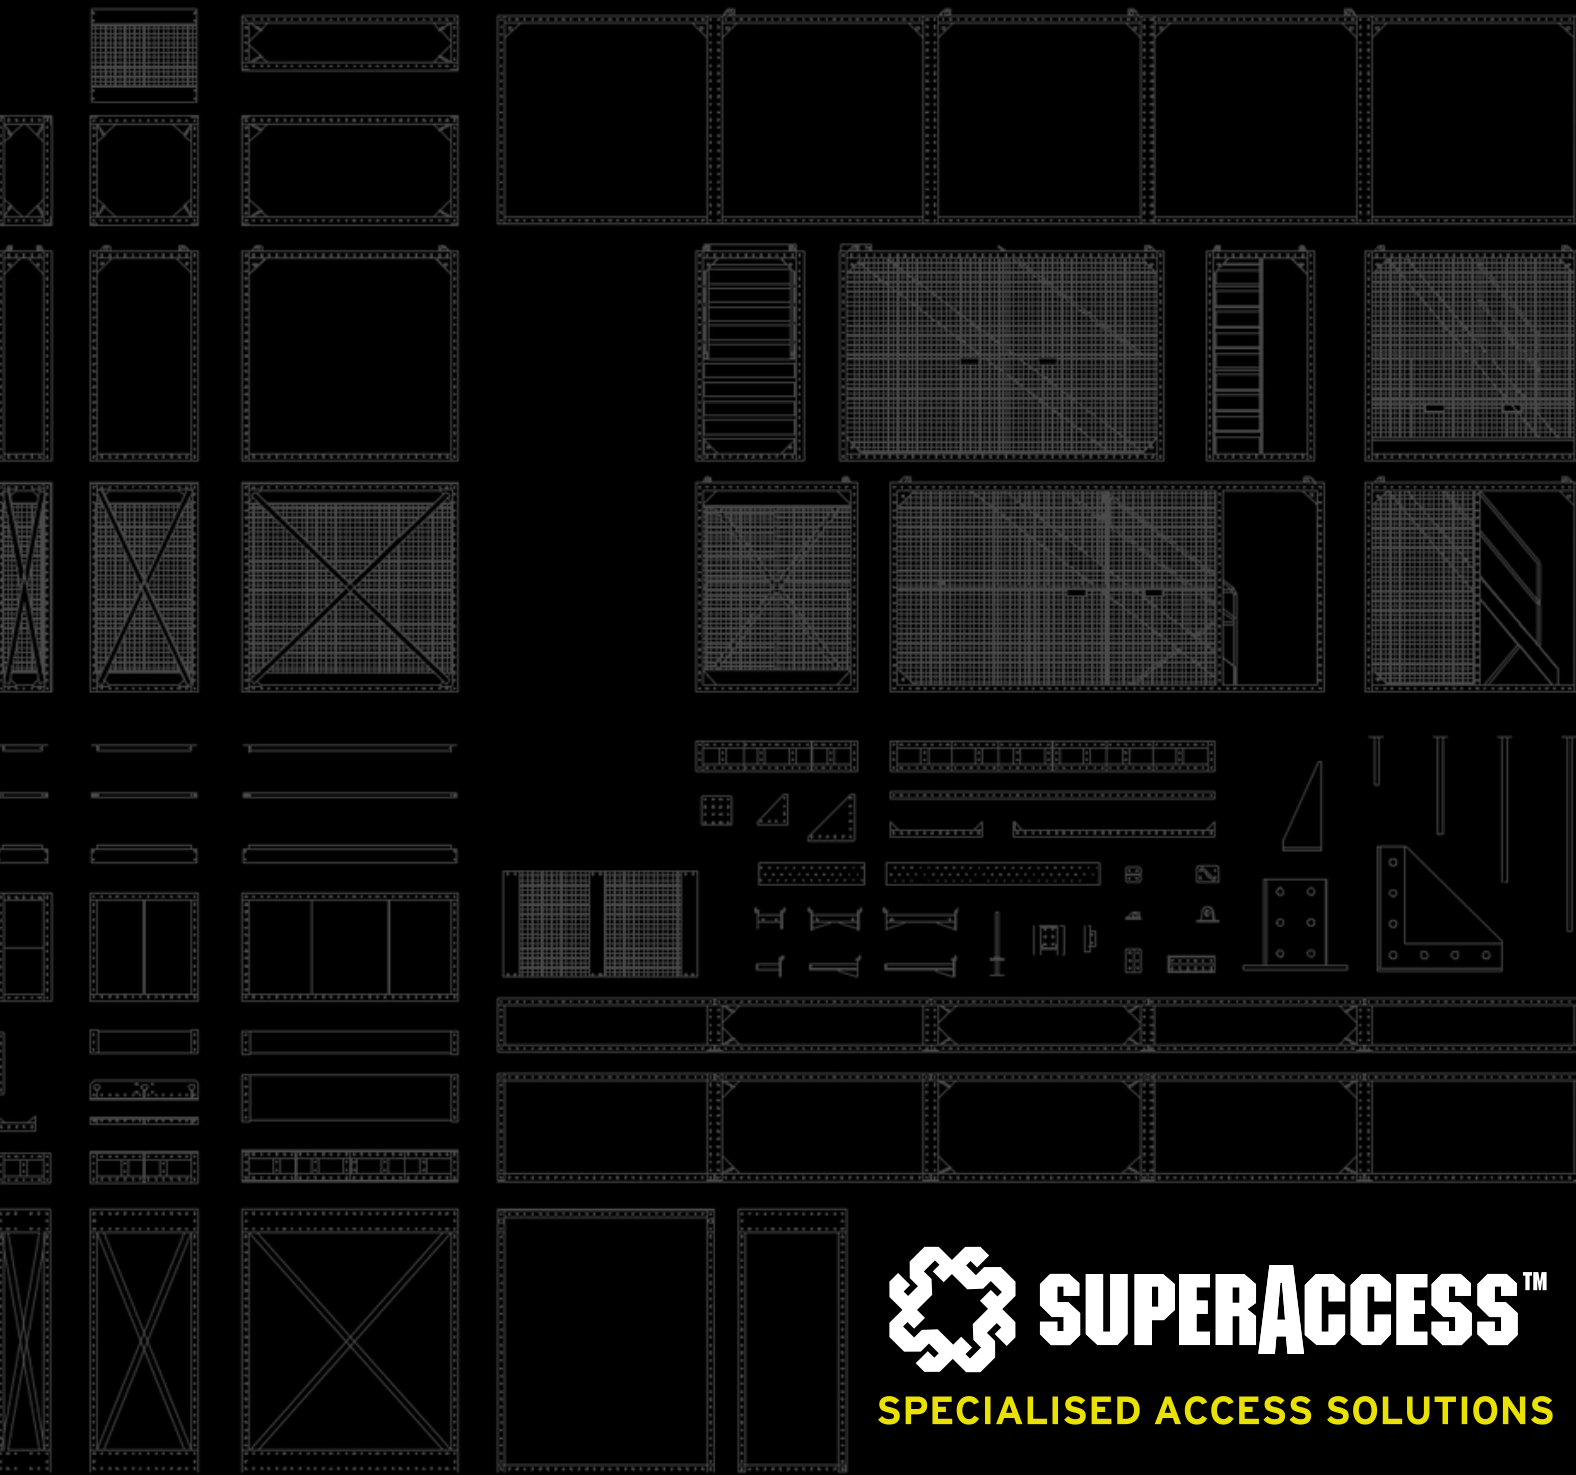

About SuperAccess™

SuperAccess™ is renowned for providing specialised access solutions for high-rise construction, rail, mining, tunnelling, and civil works. While we offer many different access solutions, time and time again clients come to us primarily for our bridges, stairs, and ramps, made custom to their unique requirements. When you work with the team at SuperAccess™ you're not only accessing innovative engineering and custom-made solutions, but the experience that makes SuperAccess™ an industry leader.

Access Your Potential

At SuperAccess™ we excel in providing specialised and customised access solutions. Using SuperAccess™ enhances site safety and productivity, providing a more advanced access solution to any means of entry. To learn more about how we can help you with your access needs, contact us on **1800 297 297** or through our [website](#).
